## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1 – 11, and 27 - 30 are drawn to assigning information stored on a computer a plurality of clearance levels classified in class 707, subclass 100.

Group II. Claims 12 and 20 are drawn to updating the set of visible smart badges and recalculating the lowest clearance level classified in class 715, subclass 511.

Group III. Claims 13 – 19, and 21 – 26 are drawn to assigning database information and providing access to that sub-set of the database information having a clearance level no higher than the lowest identified clearance level classified in class 707, subclass 5.

Group IV. Claims 31 - 38 are drawn storing plural sub-sets of information classified in class 707, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions listed as Group I, Group II, Group III and Group IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention has separate utility as follows:

Group I has separate utility such as assigning information stored on a computer a plurality of clearance levels.

Group II has separate utility such as updating the set of visible smart badges in response to a change in smart badge visibility statuses and recalculating the lowest clearance level in response to the change in smart badge visibility status.

Group III has separate utility such as assigning database information a plurality of clearance levels and providing access to that sub-set of the database information having a clearance level no higher than the lowest identified clearance level.

Group IV has separate utility such as storing plural sub-sets of information, each sub-set of information associated with one of plural clearance levels; provide access to one or more sub-sets of the information having one or more respective clearance levels no higher than the determined lowest clearance level. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III and Group IV, search required for Group II is not required for Group I, Group III and Group IV, search required for Group III is not required for Group I, Group II and Group IV and search required for Group IV is not required for Group I, II and Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Conclusion***

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred I. Ehichioya whose telephone number is 571-272-4034. The examiner can normally be reached on M - F 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on 571-272-4107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
